Subject: RE: Request for Reduced Groundwater Monitoring Well List for the Second Sampling Event in 2016

Bob:
Thank you for pulling this material together. The proposed changes for supporting the 2nd Sampling Event for 2016 are acceptable.
Feel free to contact me if you have any additional questions.

Regards-
Ellie

Subject: Request for Reduced Groundwater Monitoring Well List for the Second Sampling Event in 2016

Hi Ellie-

As we discussed on the Thursday call last time, we have put together a reduced list of wells to be sampled for our second semiannual groundwater and surface water sampling event this year. The attached table and figures show the list of wells and locations.

All 8 surface water locations identified in the RAP will be sampled. The analyte list will be the same as proposed in the RAP.

The groundwater monitor well list consists of upgradient and downgradient wells in each of the assessment areas, alternate point of exposure (POE) for plume management zones (PMZ) wells, selected attenuation monitor wells, and the groundwater hydraulic barrier (GHB) pumping well (EP-163) will be sampled. The analyte list will be the same as proposed in the RAP.

Please let me know if you have any questions or comments.

Thanks,
Bob
