

**M**r. Gunter has over 20 years of industrial safety and emergency response experience with 12 years as a dedicated Health and Safety Professional. His responsibilities have included accident and incident investigation to determine root cause, implementation and review of corporate health and safety programs, health and safety compliance auditing, and coordination and oversight of employee safety committees. He served as a volunteer firefighter and emergency medical technician from 1985 through 2002 and as an Emergency Response, First Aid and CPR/AED instructor the American Red Cross from 2001 through 2008. Mr. Gunter served in the U.S. Navy from 1985 to 1992. During that period, he was trained in shipboard and aviation firefighting, incident command, emergency evacuation, confined space entry and rescue, and emergency response coordination. Mr. Gunter's strong mechanical and operations background allows him to proactively identify and address health and safety program implementation obstacles which could negatively impact long-term program sustainability. In addition to his extensive industrial experience, Mr. Gunter served as the Health and Safety coordinator for several building and equipment construction projects at multiple sites within the U.S. With support from the construction management team, he maintained "zero injury" work sites. Health and Safety activities included daily safety meetings, periodic health and safety inspections, review of health and safety plans for high risk tasks, and pre-start up safety reviews.

## Marvin Gunter

### Project Role:

Health and Safety Marshal

### Title/Firm:

Project Scientist  
ARCADIS U.S.

### Years of Experience

20

### Education

AAS Industrial Safety & Health, Columbia Southern University, Student-Graduation June 2011

### Licenses and Certifications

OSHA - 30 Hour General Industry Certification  
OSHA - 30 Hour Construction Safety Certification  
OSHA-40 Hour HazWoper Certification  
NFPA 70E Electrical Safety Certification  
American Society of Safety Engineers

## DETAILED EXPERIENCE

- **Confidential Client: Health and Safety Auditing Program / Multi-State.** Providing Environmental, Health and Safety compliance auditing for hazardous waste treatment, storage and disposal facilities. The client's operations include hazardous waste treatment, storage and disposal facilities (TSDF), dispatch and logistics operations, operation of on-site hazardous waste cleanup operations and vehicle maintenance services. Mr. Gunter conducts the health and safety aspect of these audits, including comprehensive review of all Federal, State, Local, corporate and site-specific safety programs, training records, and a complete physical audit of the facility. This project also includes the completion of detailed audit reports including all audit findings and the associated regulatory citations and hazard classifications.
- **Marathon Petroleum: Construction/Excavation Safety Oversight / Ashmore IL.** Providing Health and Safety Oversight for a 4+ acre excavation project removing over 20,000 Tons of contaminated soil from a petroleum pipeline location. Mr. Gunter serves as the Site Safety Officer for the excavation site. He oversees the contractors performing the excavation and provides daily reports of activities occurring on site. He conducts hourly perimeter air monitoring and serves as a liaison between the construction site and private residents on properties surrounding the site. He was instrumental in developing the Health and Safety Plan for the site. In addition, he conducts daily safety briefings with site personnel and performs Job Safety Analyses for various tasks throughout the excavation site.
- **Novartis Pharmaceuticals, Inc.: Health and Safety Auditing Program / NJ.** Providing Environmental, Health and Safety compliance auditing for clinical laboratories, offices and utility support operations. The client's operations include clinical research facilities, small scale pharmaceutical manufacturing and packaging, and operation of on-site utility supply and maintenance services. Mr. Gunter conducts the health and safety aspect of these audits, including comprehensive review of all Federal, State, Local, corporate and

site-specific safety programs, training records, and a complete physical audit of the facility. This project also includes the completion of a detailed audit report including all audit findings and the associated regulatory citations and hazard classifications.

- **Westinghouse, Inc.: Health and Safety Auditing Program / US.** Providing Environmental, Health and Safety compliance auditing for various manufacturing facilities located within the United States. The client's operations include manufacturing of nuclear fuel components as well as the operation of laboratories and in-house fresh water and waste treatment facilities. Mr. Gunter conducts the health and safety aspect of these audits, including comprehensive review of all Federal, State, Local, corporate and site-specific safety programs, training records, and a complete physical audit of the facility. This project also includes the completion of a detailed audit report including all audit findings and the associated regulatory citations and hazard classifications.
- **Lockheed-Martin: Groundwater Treatment and Remediation / Great Neck NY.** Providing groundwater treatment and remediation services for a 94 acre former manufacturing site on Long Island. The operations include extraction of contaminated groundwater, removal of contaminants from the water and re-introduction of the water into the aquifer. Mr. Gunter serves as the Project Health and Safety Manager for all phases of the work conducted at this site. Duties include review and revisions to the site Health and Safety Plan, oversight of construction activities, tracking of site safety statistics and conducting site safety audits. Mr. Gunter also provides operations and maintenance support as needed to cover staff vacations, disability, etc.
- **Kennametal, Inc.: Health and Safety Auditing Program / US.** Providing Environmental, Health and Safety compliance auditing for seventeen manufacturing facilities located in twelve States. The client's operations include manufacturing of steel, tungsten carbide and ceramic tooling as well as the operation of laboratory and in-house waste treatment facilities. Mr. Gunter conducts the health and safety aspect of these audits, including comprehensive review of all Federal, State, Local, corporate and site-specific safety programs, training records, and a complete physical audit of the facility. This project also includes entering all findings into the client's electronic EH&S database as well as identifying the root cause of each finding. Customer satisfaction surveys indicate that Mr. Gunter's operations and maintenance background in combination with his vast knowledge and experience with health and safety program management provides a unique level of insight on key health and safety issues.
- **Captive Plastics, Inc.: Health and Safety Coordinator / NJ.** Manufacturer producing molded plastic containers at a 250,000 ft<sup>2</sup> facility containing production machinery, warehouse, maintenance and machine shop facilities. Mr. Gunter maintained facility health and safety programs in compliance with Federal, State and Local regulations. He was responsible for conducting an annual review of all health and safety written programs as well as maintaining OSHA recordkeeping logs and Worker's Compensation Insurance incident reports.
