

Mark R. Landress, M.S., P.G.

Mark R. Landress, P.G.
Senior Project Manager

B.S. Geology
Northeastern University,
Boston, MA

M.S. Geology
Michigan Technological University,
Houghton, MI

Focused Experience

- Remediation strategy development and planning
- Risk based remediation planning
- Field Investigations
- Regulatory negotiations
- Risk management
- Remedial solutions
- Cost avoidance strategies
- Data mining
- Site conceptual models
- Meeting facilitation
- Resource utilization
- Design and construction oversight
- Multiparty group strategy
- Project advocacy

Certifications

- Licensed Professional Geologist (Texas, North Carolina)
- 40 Hour Hazwoper Including Confined Space Entry
- NORM Radiation Safety Officer
- Lead Based Paint Inspector
- Asbestos Analysis by Polarized Light Microscopy
- Heavy Equipment Operations

Skills

- Superfund project management
- Oilfield remediation
- Multi-party group management, and facilitation towards decision-making
- Property transfer due diligence
- Health and safety assessments
- Regulatory and permitting guidance
- Construction and demolition management
- Site conceptual model formulation
- Project scheduling, logistics and critical path analysis
- Visual representation of complex technical concepts and scenarios
- Preparation of effective and audience accessible technical reports and presentations
- Project advocacy to agencies and public
- Relationships within the oil sector, mining and environmental world
- Project presentations in public forums

Representative Experience

Cox Road Landfill, Liberty County, Texas

Remedial investigation and RD/RA for 83 acre abandoned industrial waste landfill. Site investigation, geotechnical investigation geophysics, cost estimation, design investigations. Cost analysis for remedy implementation.

National Zinc Cherryvale State Superfund Site, Kansas

Oversight for remediation of former zinc smelter site. 3rd Party oversight on waste removal and construction of consolidation cell. Quality assurance, waste volume assessment and owner's representative.

MAR Services Site, Lafayette, Louisiana

Worked with client to develop, negotiate with Department of Natural Resources, then implement, a limited risk-based remediation plan meeting functional objectives of maintaining protective vegetative growth on the site. Managed a successful design, construction and closure program. Continuing oversight of project during operations and maintenance phase.

PAB Oil and Chemical Superfund Site, Abbeville, Louisiana

Operatins and maintenance for remediated oil field waste disposal site. GW monitoring, cap maintenance, reporting.

Tex-Tin Superfund Site, Texas City, Texas

Demolition of dilapidated former 120 acre smelter facility. Continuing involvement as consultant to owner with site for industrial brownfield redevelopment.

Employment History

2000 to Present Project Navigator, Ltd., Senior Project Manager

Eight years experience with increasing levels of management responsibility for oversight and coordination of State and Federal Superfund sites. Project coordination and administration of multiparty PRP groups Oversight and coordination of remedial action programs for landfills and abandoned oilfield waste sites. Environmental monitoring, reporting and management of groundwater programs. Ongoing construction management responsibility as owner's representative and liaison between site owners and regulatory agencies. Field and office supervision for technical project development, data management and display. Remedial design project scoping and oversight of geotechnical and geophysical investigations for landfill cover placement. Probabilistic cost estimation and modeling of remedy alternatives. RD/RA development.

1993 to 2000 Growth Resources, Inc., Technical Manager

Manager of operations for a service company performing oilfield remediation, tank cleaning, environmental restoration, demolition, hazardous waste handling and disposal. Specialized radioactive oilfield waste remediation, oilfield pit closures.
